The Liverpool decline for spot had a depressing effect, and there was ittle cash talk. The aggressive strength and activity of corn engendered by higher cables, the cash demand and the small country offerings made that market the center of interest on the board of trade today, May closing %6% over yesterday.

The oats market was quiet and, while feeling was bearish, the strength of corn exerted sufficient influence to hold the market firm. May closed a shade, %c up. The president of the Filipino congress is here, and from what he says I think it will be impossible for this congress to ever reconvene. When the cedar box containing the metallic casket was exposed to view it was found to be in a bad state of decay, and in a few years more it would have entirely rotted away. This is due to the moisture which has found its way into the concrete masonry which formed a covering for the casket. The casket itself was not opened, that ceremony being postponed until the remains are placed in their final resting place upon the completion of the new monument.

French Trademarks That Are Used in United States. Paris, March 10.-The Temps today

the alleged fraudulent imitation of foreign products and the alleged forming

eign products and the alleged forming of trademarks which, it is said, is now being practiced in the United States. It urges united action on the part of the French producers and the prosecution of offenders, even carrying the proceedings, if necessary, to the supreme court. It says:

"Certainly, America's high protectionist tariff greatly hinders our export trade, and reprisals are out of the question, because we send more to America than they send to us. The reciprocity treaty awaiting ratification will undoubtedly afford some relief, but even free trade will only partly remedy the evil, for how can we hope to sell our products in a country where we our products in a country where allow the manufacture of very inferior imitations which are sold under our name and as coming from us? There lies the formidable evil, to which a remedy must apply energetically and without delay."
